# TABLE OF
CONTENTS

QUALITY AS A PRIORITY

INGRESS PROTECTION

Products are sprayed from close distances with 80~100 BAR water pressure to verify the ingress protection rating, ensuring they are sealed properly.

SUBMERSION & AGING

Once products are assembled every product is run through a submersion (water dunk test), then placed onto an aging rack and powered up for 30 minutes.
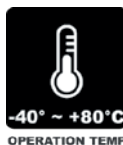

THERMAL IMPACT

Products are placed in a -40°C chamber for 30 minutes, and then placed in a 80°C chamber for an additional 30 minutes. Products are then left on for 72 hours.

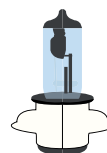

LONG TERM DURABILITY

Products are then switched on and off 20,000 times repeatedly to ensure that they remain functional after all testing.

CONSUMPTION & INPUT RANGE

All products are put on a digital power meter to test that it is consuming the correct amount of power, checking for any electrical faults.

LIGHTING TECHNOLOGY EXPLAINED

	LED	HID	HALOGEN
INTENSITY			
AMP DRAW			
LUMENS PER WATT			

KNOW THE DIFFERENCE

Vision X LED Lighting runs at a 6000K temperature for intense, bright white light for maximum visibility and safety. LED Lights do not use a bulb, making them much more durable than other options.

Vision X HID Lighting runs at a 5000k temperature for a super white beam color. HID lights require a bulb, starter and ballast to operate. They have a higher output per wattage than Halogen bulbs.

Vision X offers a number of different Halogen Lighting options. The Tungsten-Halogen series uses an oversized globe and specially engineered filament to enhance light output. Vision X offers many headlight replacements.

THE VISION X DIFFERENCE

Top Binning
Not all LEDs are created equal. Each run of LEDs by the manufacturer is binned to classify the quality within that batch. Vision X uses only top binned LEDs to ensure the highest quality.

Pulse Width Modulation
When enabled, Pulse Width Modulation integrated circuitry flashes the LED faster than the human eye can see for reduced heat, prolonged LED life and dimming capabilities.

High Efficacy
Vision X products are engineered for the highest possible luminus efficacy - the ratio of lumens per watt. Each light is specifically designed to take full advantage of the LED inside it.

Electronic Thermal Management
Integrated Electronic Thermal Management automatically regulates heat levels by engaging ETM to prolong each LEDs lifespan to 50,000 hours.
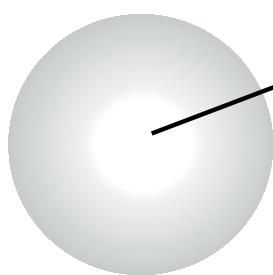

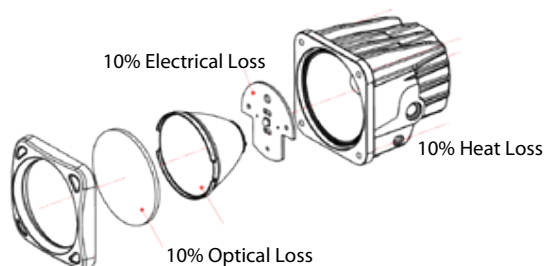

MEASURING LIGHT OUTPUT
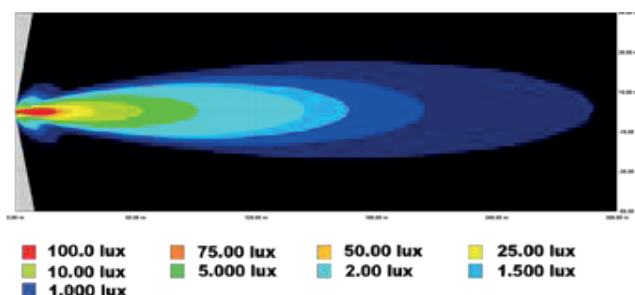

USABLE LIGHT = DISTANCE

Usable light is defined as the light that is actually converted f use in forward projection lighting. Vision X measures this by accounting for effective, rather than raw lumens in our distan calculations. The measurement of distance at which a light achieves one lux is the level of light needed to read a newspa also known as Usable Light

100.0 lux	75.00 lux	50.00 lux	25.00 lux
10.00 lux	5.000 lux	2.00 lux	1.500 lux
1.000 lux			

TOTAL LIGHT OUTPUT = LUMENS

Light source placed into lumen sphere to measure the complete output of a source

10% Electrical Loss

10% Heat Loss

10% Optical Loss

RAW LUMENS | VS | EFFECTIVE LUMENS

Lumens are a common standard for measuring light output at the source. It is important to know that the lighting source manufacturer rating is only for the light source and does not account for losses due to optical inefficiencies, electrical inefficiencies or heat.

The sheer output of the light source is not enough to capture the whole story. When rating the effective output of a light source, the light lost as heat, in optical light spray and electrical inefficiency must also be accounted for, as each of these reduce the total usable lumens. Through the use of top binned LEDs, Pulse Width Modulation and Electronic Thermal Management, Vision X Lights effectively produce the highest lumens per watt.

CHOOSING THE RIGHT BEAM
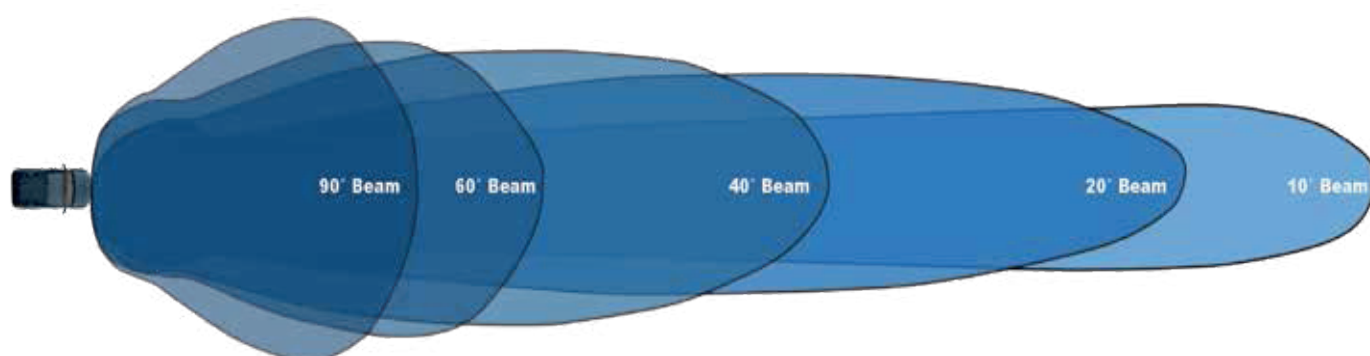

90° WIDE FLOOD
Minimal distance with the best
full range flood lighting ideal
for peripheral and direct in front
illumination.

40° MEDIUM FLOOD
Driving beam with a great amount of
spread and medium distance.

60° FLOOD
Slow speed / scene lighting beam
with limited distance but covers the
front and peripherals of your vehicle.

10° SPOT
Longest distance beam with the
smallest spread that is ideal at high
speeds.

20° SPOT COMBO
Driving beam with a moderate
amount of spread and great
distance.

OPTIC TECHNOLOGY | VS | IRIS REFLECTOR

Vision X uses advanced optic technology to affect how the light is dispersed to creates each beam pattern. Optics allow for each light to have different beam pattern options ranging from 10° spot all the way up to 90° wide flood. Generally, with the use of optics there is loss in distance then if it was using an iris reflector, but in exchange gives the light a more full beam.

Iris reflector takes full advantage of the LED and is specifically engineered to project the light as far as the LED will allow it to go. In turn, this allows lights with Iris reflectors to reach distances that a light with optics cannot. In exchange for this massive distance boost the iris reflector is limited to mostly a spot beam pattern.

INCLUDED WITH EACH LIGHT

LIFETIME LIMITED WARRANTY

1. Proof of purchase is required to validate warranty and is valid from the original date of purchase. All products must be bought through a Vision X Authorized Dealer or one of their dealers/resellers.

2. Improper installation, accident, abuse, neglect and normal wear are not covered under warranty.

3. Lights operated in environments over 150o Fahrenheit are not covered under warranty.

4. Warrantied items will be repaired to working condition and returned without cosmetic alterations.

5. Warranties should be handled through the dealer/reseller the product was purchased from; customer is responsible for delivery to Vision X Returns in Washington.

6. If product is not under warranty, customers will be responsible for shipping return shipping charges.

7. Additionally, non-warranted items can be repaired at the customer's expense of parts and labor, at the discretion of Vision X Lighting, who will provide an estimated repair cost before proceeding with the repair.

THE 2ND GENERATION IS HERE

THE 2ND GENERATION IS HERE

The most powerful & versatile off-road LED lighting system. From 3.7" to 8.7" sizes, each is available in a Long Distance or Multi-LED Full Beam version to shine the light exactly where you need it. The Day-White lighting color allows you to comfortably see the terrain over unmatchable distances. The 25-Lights-In-One Cover system allows you to change light pattern and color to fit your driving environments. Lifetime Limited Warranty.
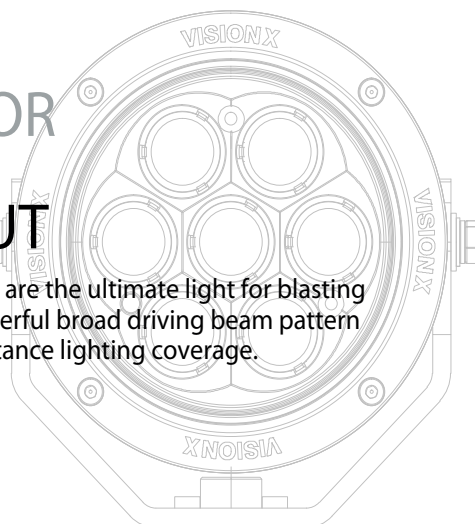

LIGHT CANNON LED

6.7" SINGLE | LED

6.7" MULTI | LED

MULTI LED FOR
MAXIMUM LIGHT OUTPUT

Multi-LED CG2 Light Cannons are the ultimate light for blasting through the night with a powerful broad driving beam pattern and outstanding medium distance lighting coverage.

Beam/Color Changing Polycarbonate Covers (See p.17)

SINGLE LED FOR
FOCUSED DISTANCE OUTPUT

Single LED CG2 Light Cannons take lighting to uncharted territory with incomparable distances. The industry-leading Luminous Big Chip LED and Iris Reflector throws a violent blast of light that penetrates the night up to 3,500 feet. If you need superior distance from your lighting, this is the solution.
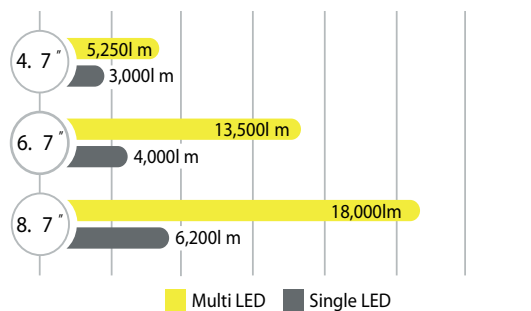

LIGHT CANNON LED
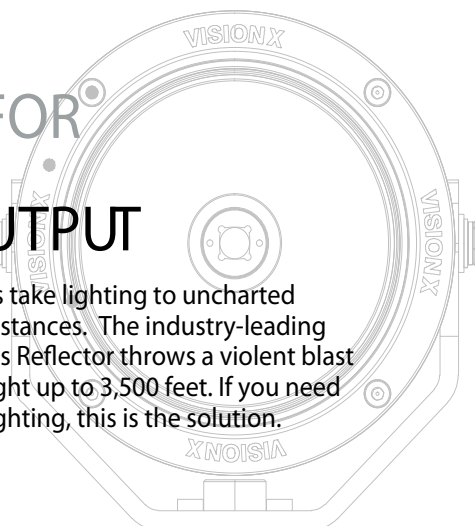

ULTRA EFFICIENT MULTI LED
Top binned 7W Cree LED provides the greatest light output from a multi source LED light of its size.

ADVANCED OPTIC TECHNOLOGY
Each led is focused using a 10° optic that allows for the flood pattern to achieve full beam spread.

LUMEN OUTPUT COMPARISON

Size	Multi LED	Single LED
4.7"	5,250l m	3,000l m
6.7"	13,500l m	4,000l m
8.7"	18,000lm	6,200l m

WEATHERPROOF CONNECTOR
The Deutsch plug ensures the functionality of every Light Cannon even in the harshest conditions.

HEAT MANAGEMENT SYSTEM
Advanced circuitry and aluminum heat sink design ensures maximum light output during sustained periods of use.

ADJUSTABLE AIMING SYSTEM
Steel trunnion mount provides 45° of lightingadjustment secured by a robust locking system.

BUILT FOR HARSH CONDITIONS
The IP-68 / 69K certified housing ensures a water tight seal even when completely submerged.

SNAP-ON| LIGHT COVERS

25 LIGHTS IN 1
WITH POLYCARBONATE COVERS

Each Light Cannon is 25 Lights In One with the help of the unbreakable polycarbonate snap-on covers that can alter the beam pattern and change the color of the Cannon. Tackle any weather condition with the proper color cover, or quickly change your spot cover to a flood cover for a wider beam when necessary.

COLOR OPTIONS

BLACKOUT | PROTECTIVE
Covers the fixture with a solid black protective cover with a high contrast "X" logo. Required in select states for on-road use.

CLEAR | PROTECTIVE
Protects light from dust, debris and particulates without changing light color or performance.

AMBER | FOG
Battles fog conditions by reducing the amount of blue light. Mimics classic Halogen color temperature. Great for driving in fog at high speeds.

BLUE | SNOW
Increases lighting distance when used in snow conditions by reflecting the blue light off the snow. Recommended for vehicles in heavy winter conditions.

RED | DUST
Reduces light temperature and glare back in order to enhance penetration in dust and air particulate. Ideal for vehicles in extreme dust conditions.

BEAM OPTIONS
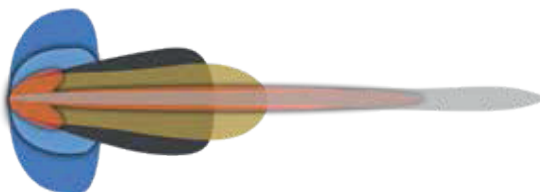

SPOT
Spot covers maintain original lighting beam pattern while protecting the lens from harmful debris.

COMBO
Combo covers combine the distance of a spot cover with the added peripheral illumination of a elliptical cover.

EURO
Illuminate some peripherals while maintaining effective distance.

ELLIPTICAL
Reduces peripheral illumination while losing minor distance.

WIDE FLOOD
Maximum wide field of view illumination in exchange for distance.

TRAIL FLOOD
Maximum vertical field of view illumination in exchange for distance.

EVOLUTION OF ADVENTURES

Off-road adventures
will never be the same.
Or dark.

LED
LIGHT BARS

XPR SERIES

The XPR Series Light Bars utilize Iris Reflector technology that is specifically engineered to project the full light output of each LED to produce an unmatched distance spot beam.

LUMENS | VS | DISTANCE

XMITTER PRIME XTREME SERIES

The Xmitter Prime Xtreme Series Light bars are stacked with high output LEDs that allows each bar to produce a full spread beam that will outshine the competition.

XPRS
XMITTER PRIME RACE SERIES

RACE SERIES SPOT BEAM FOR
ULTIMATE DISTANCE OUTPUT

The XPR-S Series Light Bar uses a high intensity LED that allows the beam to take full advantage of the Iris Reflector and project the light up to 75% further than the XPR series. Designed to outshine and outlast the competition.

SIZES : 6" | 12" | 19" | 24" | 30" | 35" | 40"| 45" | 51" |

SMOOTH BACKLIT HALO OPTION
The XPR-S is available in a halo model that can be used as a daytime running light.
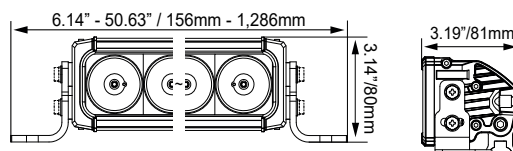

6.14" - 50.63" / 156mm - 1,286mm

3.14"/80mm

3.19"/81mm

DUAL MOUNTING STANDARD
Mounting options include side wing mounts and our patented mounting feet.

END CAP MOUNTING OPTION
Vision X offers end caps that attach for side bolt mounting. (See p.73)

HIGH INTENSITY CREE LED
The 10W XP-L-HI LED from Cree is what allows the XPR-S to project light up to 3,700 ft.

THE NEW LO PRO BAR

Bringing our light bar series to new heights with a new low profile housing and upgraded mounting system.

SLIM
FOR THE
WIN

Combining the
ultimate distance
projection of an XPR
and the compact size
of an Xmitter Lo Pro.
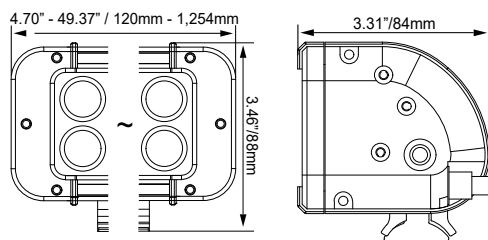

XMITTER PRIME | XTREME

DUAL ROW LEDS FOR
XTREME OUTPUT

Since the Xmitter Prime Xtreme was first launched, it has held the title of "Most Raw Lumens Per Inch". Pumping out nearly 1,000 raw lumens per inch, the Xmitter Prime Xtreme is unmatched in terms of effective power and performance.

*Also Available in AMBER LED
(Reference VISIONXLIGHTING.com for Part #s)

SIZES : 5" | 8" | 11" | 18" | 20" | 30" | 40" | 50" |

4.70" - 49.37" / 120mm - 1,254mm

3.31"/84mm

3.46"/88mm

DIMMING CAPABILITIES
Every Xmitter Prime Xtreme bar comes standard with a dimmer wire that allows you control the intensity of the light.

HIGH OUTPUT CREE LED
The 5W XP-G2 LED from Cree allows the Xmitter Prime Xtreme to output up to 47,000 Lumens (50in).

END CAP MOUNTING OPTION
Vision X offers bolts that attach for side bolt mounting. (See p.73)

WATERPROOF HOUSING
The IP-68 rated housing ensures a water tight seal even under the toughest conditions.

SENSE
BAR

The faster you go the further you need to see right ? We agree and have the bar you need.

BEAM FOR EVERY SPEED

Bringing the pow of the Borg Bluetoo... Control to a self adjusting light bar.

VX SERIES
LED HEADLIGHT TECHNOLOGY

NEXT LEVEL
STYLE | OUTPUT | RELIABILITY

LED
HEADLIGHTS

Take your desire for high powered LEDs to the streets with the DOT Approved VX Series LED Headlight. The VX Series boasts a daytime running halo, low and high beam modes, and a robust aluminum polycarbonate hybrid housing. E-Mark and ADR approved models also available.

VX SERIES
LED HEADLIGHT TECHNOLOGY

LED HEADLIGHTS MEETS
STYLE & PERFORMANCE

The DOT Approved VX Series LED Headlight leads the LED Headlight industry in both style and performance. With an integrated LED Halo Ring, the VX Headlight is sure to turn heads while also delivering a dramatically improved night driving experience over factory headlights. The VX Series is currently available in 7" & 5.75" Round as well as 4x6" Rectangle with a Polished Chrome finish or a Black Chrome finish.

ADR and E-MARK Approved models are available for those who live in Australia and Europe.

Multiple direct plug-and-play accessories are available that help give you the most out of your VX Series LED Headlight. (See p.74)

DIFFERENT SIZES | SAME LED TECHNOLOGY

7.0"

42W | 3.5A | 4,210 Lumens(ea)

BRIGHT DAYTIME RUNNING HALO
Every VX Series Model Headlight features an ultra smooth LED Halo Ring that can be ran independently.

WIDE SPREAD LOW BEAM
One main 12W LED produces the wide spread low beam with the help of 5W LEDs on the sides to fill in the roadway directly in front of your vehicles

HIGH OUTPUT HIGH BEAM
Two 10W LEDs located under the low beam utilize Iris Reflectors to produce a long range high beam.

WATERTIGHT HOUSING
The IP-68 watertight housing comes equipped with a ultra rugged Polycarbonate Lens and one-way Gortex Valve to block moisture build up.

LED TECHNOLOGY MEETS
PASSING LAMP

Vision X Lighting's XMC 4.5" LED HALO Passing Lamp Kit grants extra visibility and enhances your safety on the road. These powerful 10W lights each pack five times more output than the stock passing lamps, and draw six times less amperage. Dramatically improve your performance while increasing visibility and safety. The MSR Style Reflectors give the XMC Passing Lights a powerful beam pattern than combines distance with full spread coverage.

LIGHT CANNON LED

BIG CHIP TECHNOLOGY FOR
INTENSE DISTANCE OUTPUT

The Vision X Original Light Cannon uses a single source Luminus LED and advanced Iris Reflector Technology to place it at the top of its class in the single source LED lighting division. The Light Cannon utilizes a focused beam pattern to provide up to 3,200 feet of usable light (8.7"), and is housed in a robust black aluminum polycarbonate hybrid housing for long lasting durability, even in the most extreme conditions.

Beam/Color Changing
Polycarbonate Covers (See p.17)

8.7" | 90W | 5,800 Lumens

6.7" | 50W | 3,200 Lumens

4.5" | 25W | 2,500 Lumens

WATERPROOF HOUSING
The lightweight hybrid housing is IP-68 Rated, which provides a watertight seal.

LUMINUS BIG CHIP LED
Each Light Cannon uses an industry leading single source LED that is highly efficient and brighter then the competition.

IRIS REFLECTOR TECHNOLOGY
Focusing the power of the LED the Iris Reflector projects the spot beam tremendous distances.

SINGLE BOLT MOUNTING
Versatile Single Bolt Mounting allows the Light Cannon to be installed with ease on anything from A-Pillars to Roof Racks.

* KITS INCLUDE 2 LIGHTS + HARNESS

OPTIMUS
UNIVERSAL LED DRIVING LIGHT

COMPACT HOUSING MEETS DISTANCE OUTPUT

By combining Single-Source LEDs with Vision X's Iris Reflector Technology, the Optimus Series is capable of reaching a staggering 883' of usable light.

The Optimus is available in four different beam patterns, allowing users to choose between distance or spread.

Vehicle Specific Kits Available for :
- Fog Light Kits for Trucks and Jeeps (See p.61-63)
- Headlight Kits for RZR (See p.56)

Beam/Color Changing Polycarbonate Covers (See p.17)

VL-SERIES
LIGHT DUTY COMMERCIAL

VERSATILITY MEETS
LIGHT OUTPUT

The VL-Series LED Light Duty offers outstanding light output in a functional design which can be easily adjusted with the single bolt bracket. High quality construction and components enable VL-Series LED Light Duty to withstand vibration up to 15.6 Grms. Built-in reverse polarity protection helps prevent accidental damage caused by incorrect installation. VL-Series LED Light Duty work lighting is a high value, versatile range designed for many light duty commercial applications.

3 DIFFERENT HOUSING OPTIONS
2 LED AND WATTAGE OPTIONS
6 VERSATILE LED LIGHTS

VL-SERIES LED LIGHTS FEATURES:

ULTRA BRIGHT CREE LEDS
Utilizing 5W Cree LEDS, the VL-Series Lights pump out 106 Lumens per watt.

FLOOD OPTICS
Each LED has a 40° flood optic that allows for each light to produce a wide spread beam.

UNIVERSAL MOUNTING
The single bolt mounting system allows for simple and easy placement.

VX GRILLE | SERIES

BY ROYALTY CORE

GRILLE | FEATURES

FACTORY LOCATION MOUNTING
OEM replacement grille mounts to factory locations.

DURABLE CONSTRUCTION
Satin black powder coating over stainless steel grille.

STAINLESS STUDS
Triple chrome plated t304 stainless studs with black studs available.

LIGHT CANNON | OPTION

FEATURING CG2 4.7" LIGHT CANNONS
The CG2 Light Cannons is Vision X's latest and greatest of the Light Cannon series. This configuration combines the distance of the big chip single source CG2 Cannon with the massive light output of the multi-LED version. The pairing of these two lights creates an unheard of amount of brightness and distance ideal for any situation.

Beam/Color Changing
Polycarbonate Covers (See p.17)

LIGHT BAR | OPTION

FEATURING XPR-9M LIGHT BAR
Utilizing top-binned 10-Watt LEDs and large proprietary 1.5" diameter IRIS Reflectors, the XPR-9M Light Bar is capable of reaching a staggering 1,365 feet of usable light. This unmatched long-distance projection is also accompanied by precisely tilted IRIS Reflectors that create a unique combination beam pattern to provide even more visibility at the road's edge.

COVER OPTION
Blackout Cover (See p.75)

HID LIGHT SERIES

PERFORMANCE HID FOR
LONG RANGE OUTPUT

The Xtreme Performance HID was engineered with input from Baja 1000 winning racers to further enhance the race proven Vision X HID series. Each light includes a weatherproof Deutsch Connector with Plug-and-Play Harness and features a durable, lightweight polycarbonate blackout cover.

The HID XP Series is currently trusted by professional off-road rally teams in the United States and Canada.

Internal Ballast & Starter
The ballast takes the standard 12V input power and increases this to the 32,000V that the bulb operates at and the starter is used to ignite the bulb. Vision X uses all internal components for an all-in-one package

8.7"

HALOGEN BULBS FOR
BRIGHTER AND WHITER LIGHT

Increase brightness by up to 50% with the Vision X headlight bulbs. Vision X headlight bulbs provide a more natural light for increased visibility and safety. With three lines to choose from, we offer the perfect mix of cost and performance for any driver.

Unlike other Halogen Bulbs on the market, Vision X D-Series bulbs are DOT Approved and offer a lifetime warranty. Enhance your night time driving experience while cooperating with all laws and regulations.

* For H&L Series Bulbs refer to website for Part #s.

MARINE GRADE COATING
SAME LED TECHNOLOGY

Submersible up to 100 feet, the Subaqua offers a powerful LED light module for underwater applications. The 6 LED model offers double the effecitve light output of the previous 4 LED generation Subaqua. Designed for transom lighting, dock lighting and any underwater application.

Additionally, the Subaqua is outfitted with a 4 foot marine-grade cable that will not only ensure durability, but also make installation a breeze.

LED Color Options : 🟠 🔴 🔵 🟢 ⚪

FLOOD OPTICS
Utilizing a medium beam 25 degree optic the Subaqua has optimum underwater operation.

COMPACT SIZE
In a compact 4.13" diameter the 6 LED Subaqua fits anywhere.

LOW POWER DRAW
With an extremely low power draw of 1.5 amps, the Subaqua will not put a large strain on your boat battery.

MOUNTING SOLUTIONS

LICENSE PLATE MOUNT | KIT

The License Plate Mount makes it easy to add any 12" Vision X LED Light Bar meaning that you can add up to 4,700 lumens to your vehicle with no drill holes or mess.

The License Plate Mount goes behind the license plate using the same holes as the license plate already uses, for easy plug and play mounting.

LIGHTING ACCESSORIES

BORG CONTROL | MODULE

Unlock the full potential of your Vision X LED by equipping it with Borg. Everything from strobing intervals to light intensity can be controlled by your smartphone via bluetooth connection. Additionally, you'll have the power to see valuable data relayed from your LED Light such as humidity, temperature, voltage, RSSI, and elevation. Even further, you can track your g-force level and acceleration with only a few taps.
